

e-Business Cloud - Fully Managed B2B Integration Services

The e-Business Cloud is a private cloud Business to Business (B2B) integration service offering that facilitates the exchange of all electronic documents with your Trading Partners and automates key processes. Deployed as a fully managed solution, the e-Business Cloud is customizable with valuable features and state-of-the-art technology. In addition, Amalto provides complete business process analysis for the e-Business Cloud, as well as design, implementation and support.

Many **Oil & Gas, Environmental Services, Industrial and Enterprise** companies leverage their e-Business Cloud to:

- Streamline **Order to Cash processes with Customers** (processing inbound Orders, sending back Order Confirmations, Advance Shipping Notices and AR Invoices)
- Automate **exchanges with Logistics Providers** (3PL, 4PL and carriers)
- Enable **electronic transactions with Suppliers** via a Trading Partner Community
- Handle **master data and transactional data synchronization** between ERPs and SaaS solutions, etc.

e-Business Cloud Features

e-Business Cloud Reporting

Platform provides multiple types of configurable reports

- Online graphical reports
- Downloadable Excel reports
- Scheduled email reports - displayed in body or sent as an attachment (Excel, CSV, PDF, etc.)

Workflow Engine

- Set up highly configurable workflows that request users to interact with the system and handle tasks allocated to them
- Typical use cases include: Review and approval of incoming Orders, review and completion of outgoing transactions such as Order Confirmation and AR Invoices, approval of inbound AP Invoices, etc.

iOS & Apple Watch Apps

Quickly and easily monitor your KPIs, including:

- Processed invoices (number and amount of all invoices processed through the e-Business Cloud)
- Delivered invoices (number and amount of invoices successfully submitted to your customers)
- Failed invoices (number and amount of invoices that failed)
- Failure ratio (and how it evolved over the past months)

Solution Benefits

- Improved productivity
- Reduced errors and minimized disputes
- Increased reporting control and visibility
- Improved regulatory compliance
- Lowered Working Capital Cycle
- Reduced environmental impact by eliminating paper use
